

Korea ... consciousness of wrong

Moon bears in Korea are being ravaged and driven to extinction for their bile. Only 19 moon bears remain in Korea's wild, while 1,600 bears languish in locked cages they can never leave. The bears are tortured daily through procedures so painful that it drives many bears to madness. We can end disgraceful bear bile farming in Korea, and we must!

A black bear is seen through a chain-link fence in a cage. The bear's head and one paw are visible, looking towards the camera. The cage is made of metal bars and chain-link fencing. The background is a dark, possibly wooden wall.

End Bear Bile Farming

a practice that should never have started
